THE TRAM CARS.

EDITOR BULLETIN: ---

The 8:30 west-bound train on Beretania street was delayed yesterday on the switch, for over ten minutes. The eight a. m. west-bound train was this morning so long delayed that the car from the Esplanade could have passed before the car in question left the switch. It would be a good idea for the Tram Car Manager to at least inaugurate some system of running on this branch of | Magoon for defendant, the road, which would facilitate the convenience of patrons.

THE FIRE PULICE.

There was a largely attended meeting of the Fire Police last night, presided over by Capt. T. Krouse. After transaction of routine business, the new caps and belts were distributed. The caps are dark with straight peaks, and ornamented with a pretty crescent. The belts are very pretty as well as of durable quality, being double thickness of leather with white enamel face outside, fancy stitched in black, also having a sliding monogram for the front in black, white and red, and "H. F. P." in raised enamel letters on the back. The "fine body of men," as this useful corps has been called, will be finer still on parade in

"ZEPHYRS" WORK THEM.

Just think of a twelve-lost Arrans tor running a six-inch pump and fill-ing a thirteen hundred gallen tank in less than an hour! Do you know of any other wind motor that will do We try to keep pasted on such things but fail to find anything in wind Distory that even approaches that reced. The mills we speak of force water five hundred free and elevate it twenty-five-hard to believe isn't it, but it's a fact. They are as strong as the strongest majoral and

and cheaper than any other will on the market, two points of excellence Another thing in their construe tion, or mechanism, whichever you Joe Koa was sentenced to 24 prefer, is the fact of their being made so that they will not fall to pieces by being overworked. They make three revolutions and pump once. The strain is not all put on the whoel at each revolution, it is equally divided and consequently the whice hasts longer than the ordinary run of wind mills. We are not afraid to talk shout the Aermotors now that they have been fried and proved satisfactory right here at home. We have had to street, publish testimonials from pastics at a distance because Aermotors were new here and had not been tried, but now that we have sold so many and everyone has been satisfactory to the purchaser we can get on all right by referring parties to those people who have tried them here. We continue advertising them because they are still a comparatively new thing on the Islands-before long they will not need a single notice to the newspapers because they will sell them alves.

Customers who notice our shelves so well-filled with fine goods wonder at our having no old stock. The problem is simple! We are constantly selling and ever replacing the goods with others. We have two warehouses filled with goods and we draw from them as we need and so keep our stock well up. You don't often ask as for what we do not have, we keep up with the times and by so doing can supply your wants. The Aermotor is a fair illustration of the fact.

By recent arrivals we have received the finest assortment of General Hardware, Housefurnishing Goods and Silverware ever imported to this city. We wish to call your attention particularly to the Silverware because it comprises articles which you are no doubt in need of mal have been unable to procure, some picces are marvels of the silversmith's art.
